

RT OS and RT Linux

Daniel Bristot de Oliveira

Who I'm and what we will
talk about?

an Operating System overview

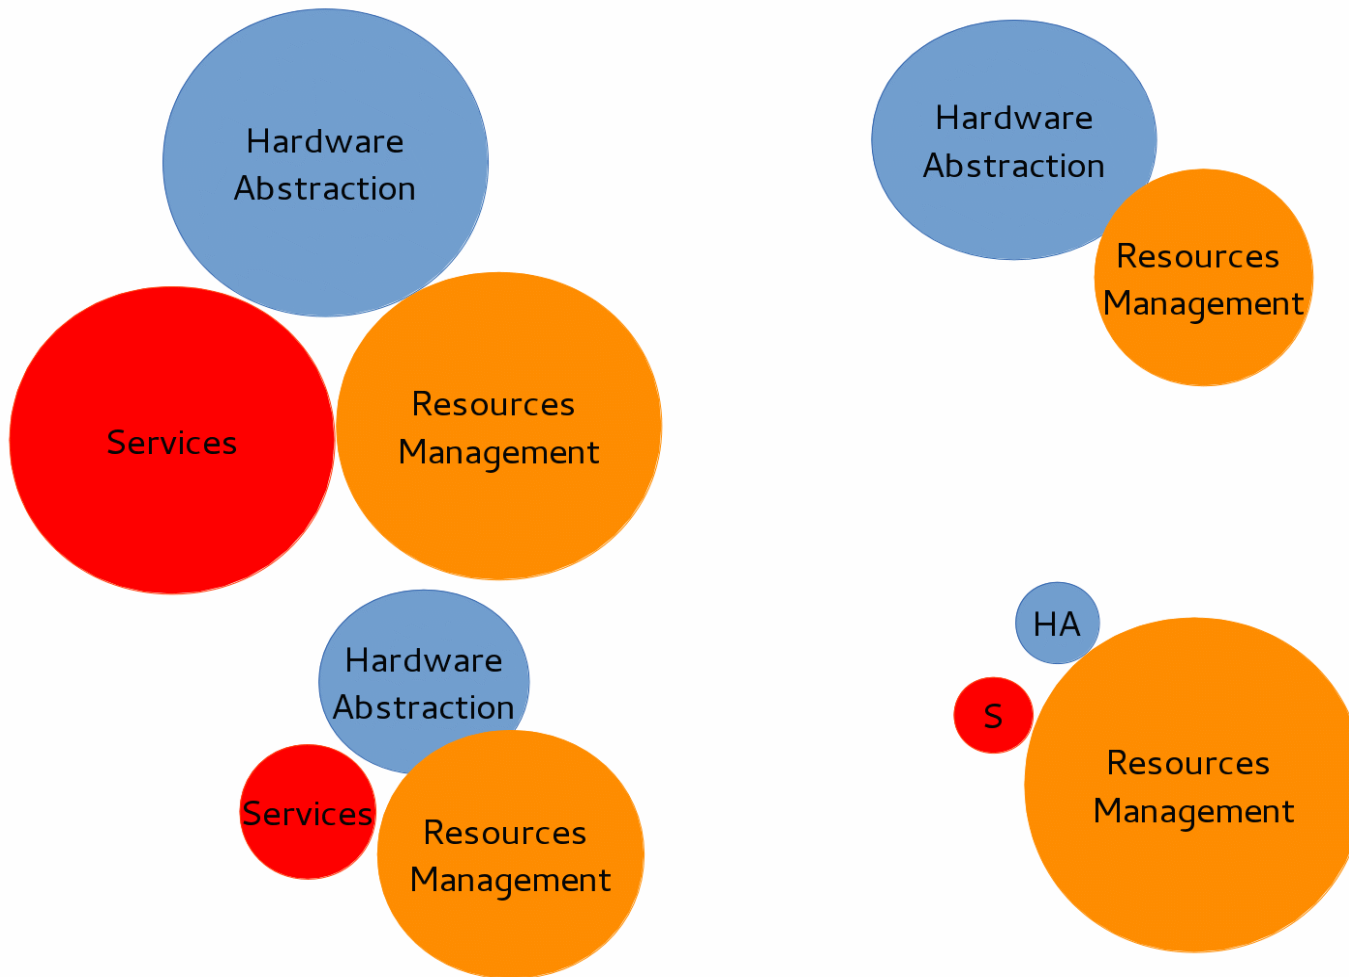

Application

Operating System

Hardware

Tasks of an OS

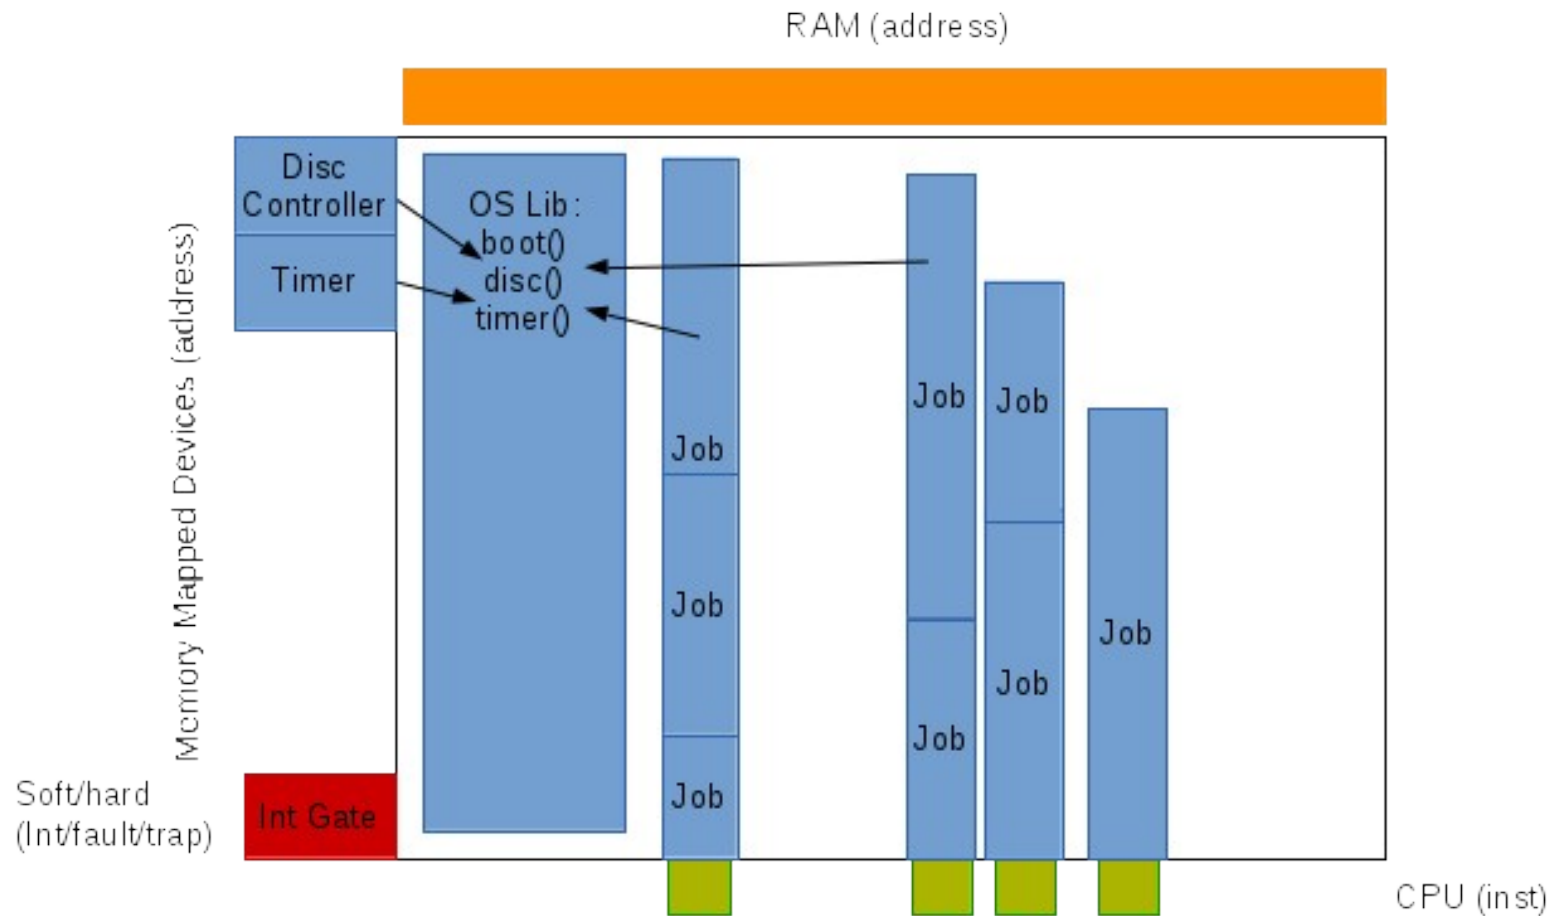

Hardware...

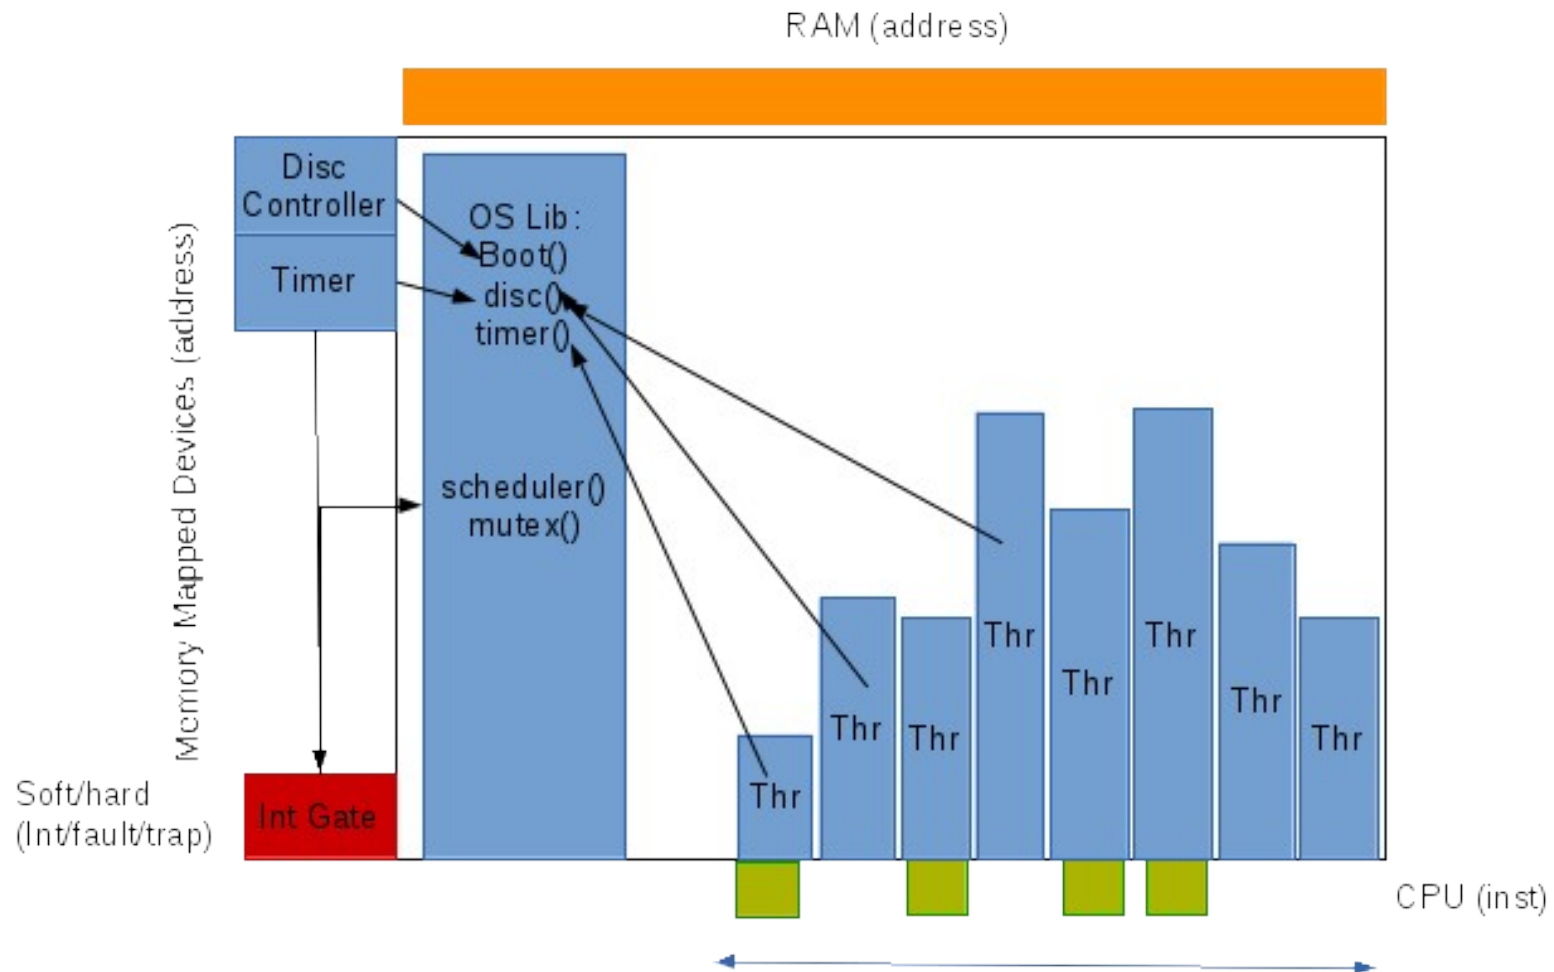

Embedded system without OS

OS as a library

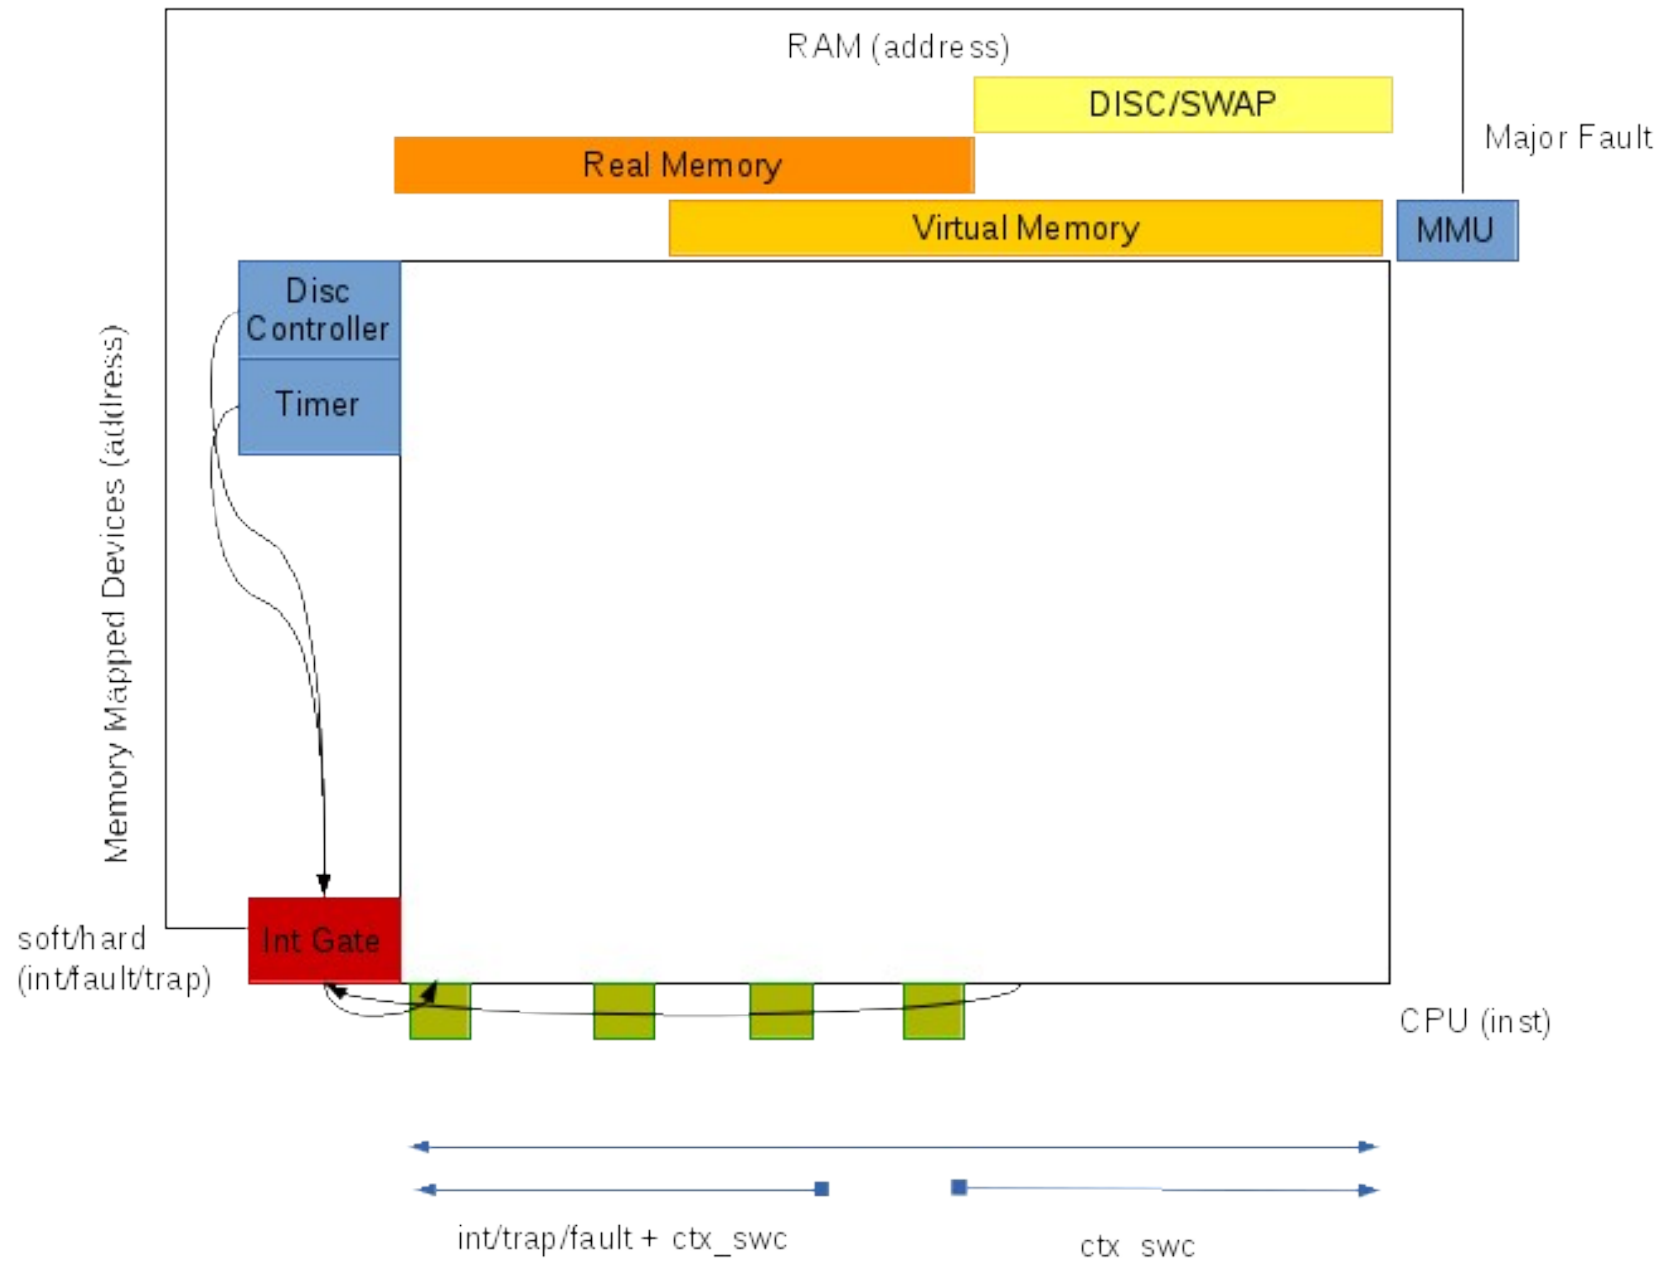

OS as a library

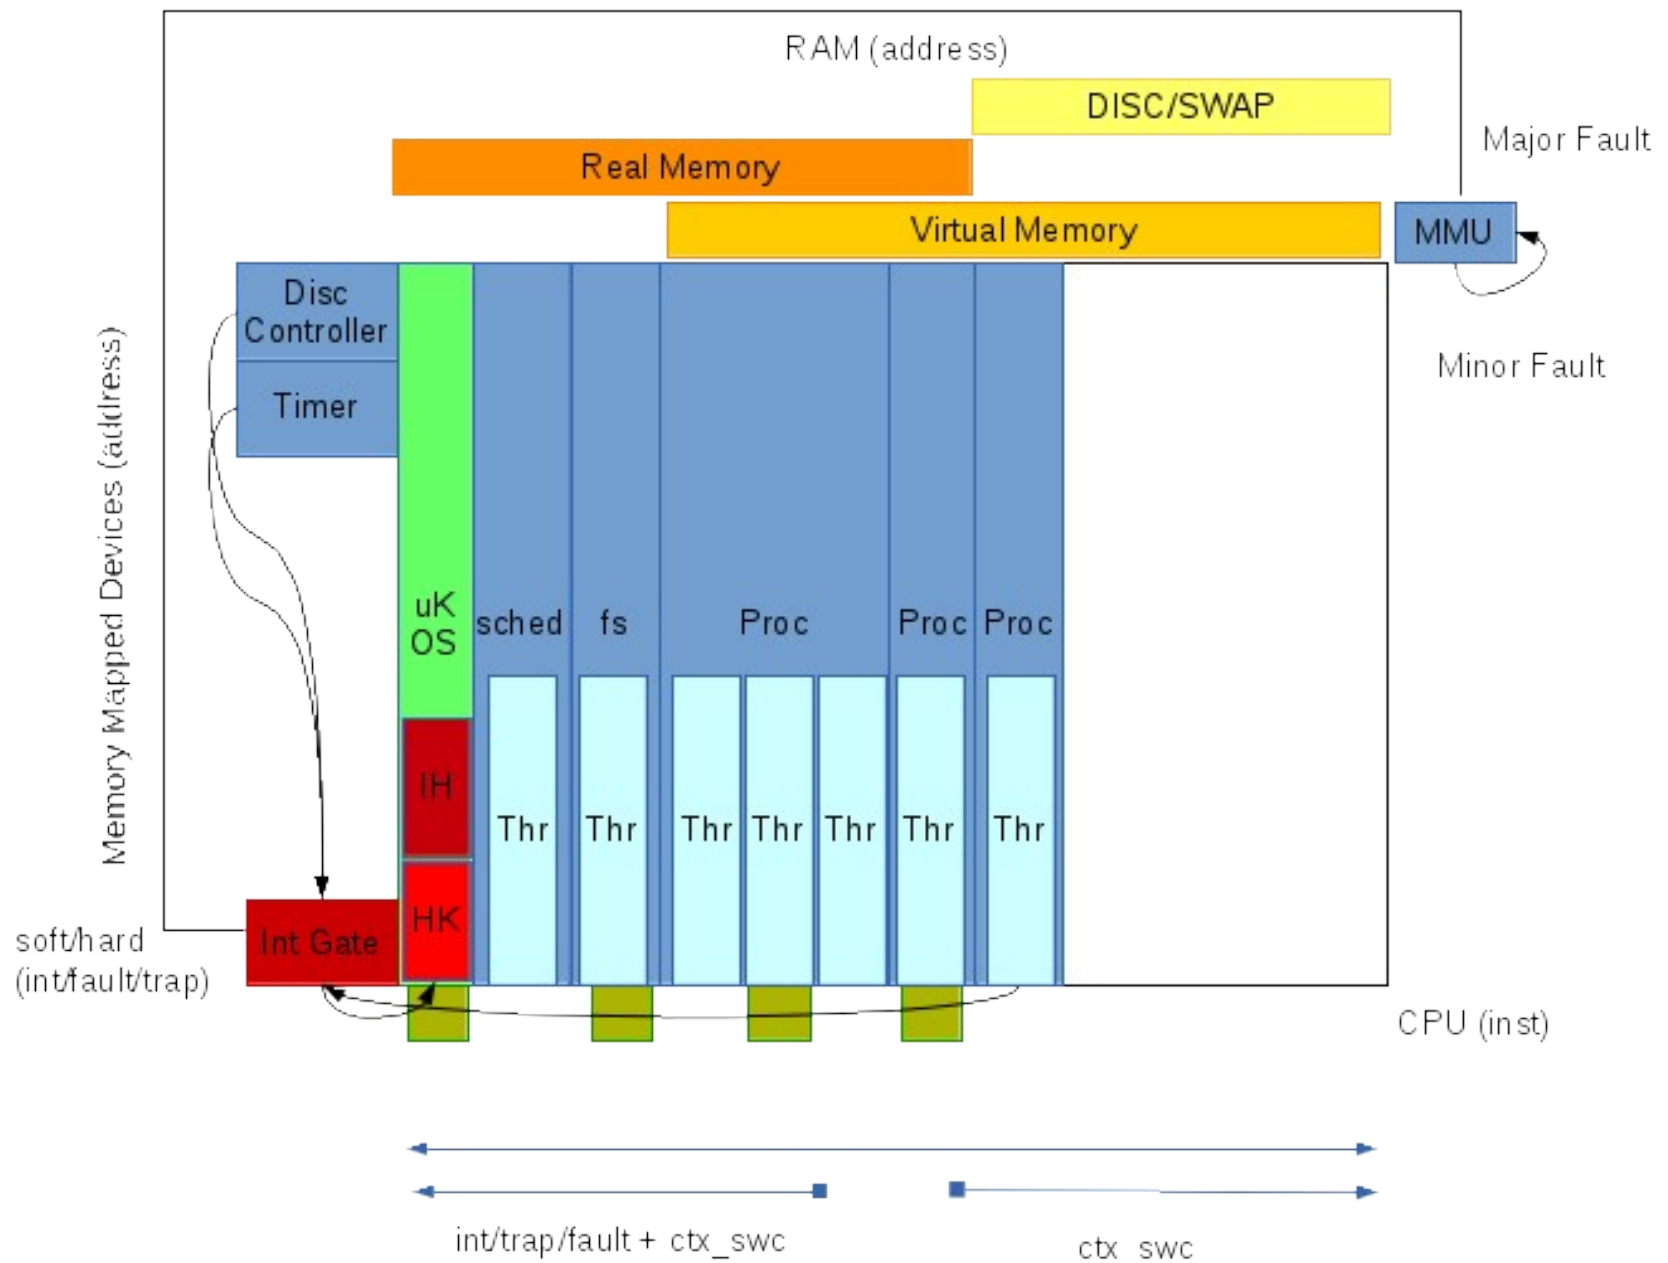

OS as a library

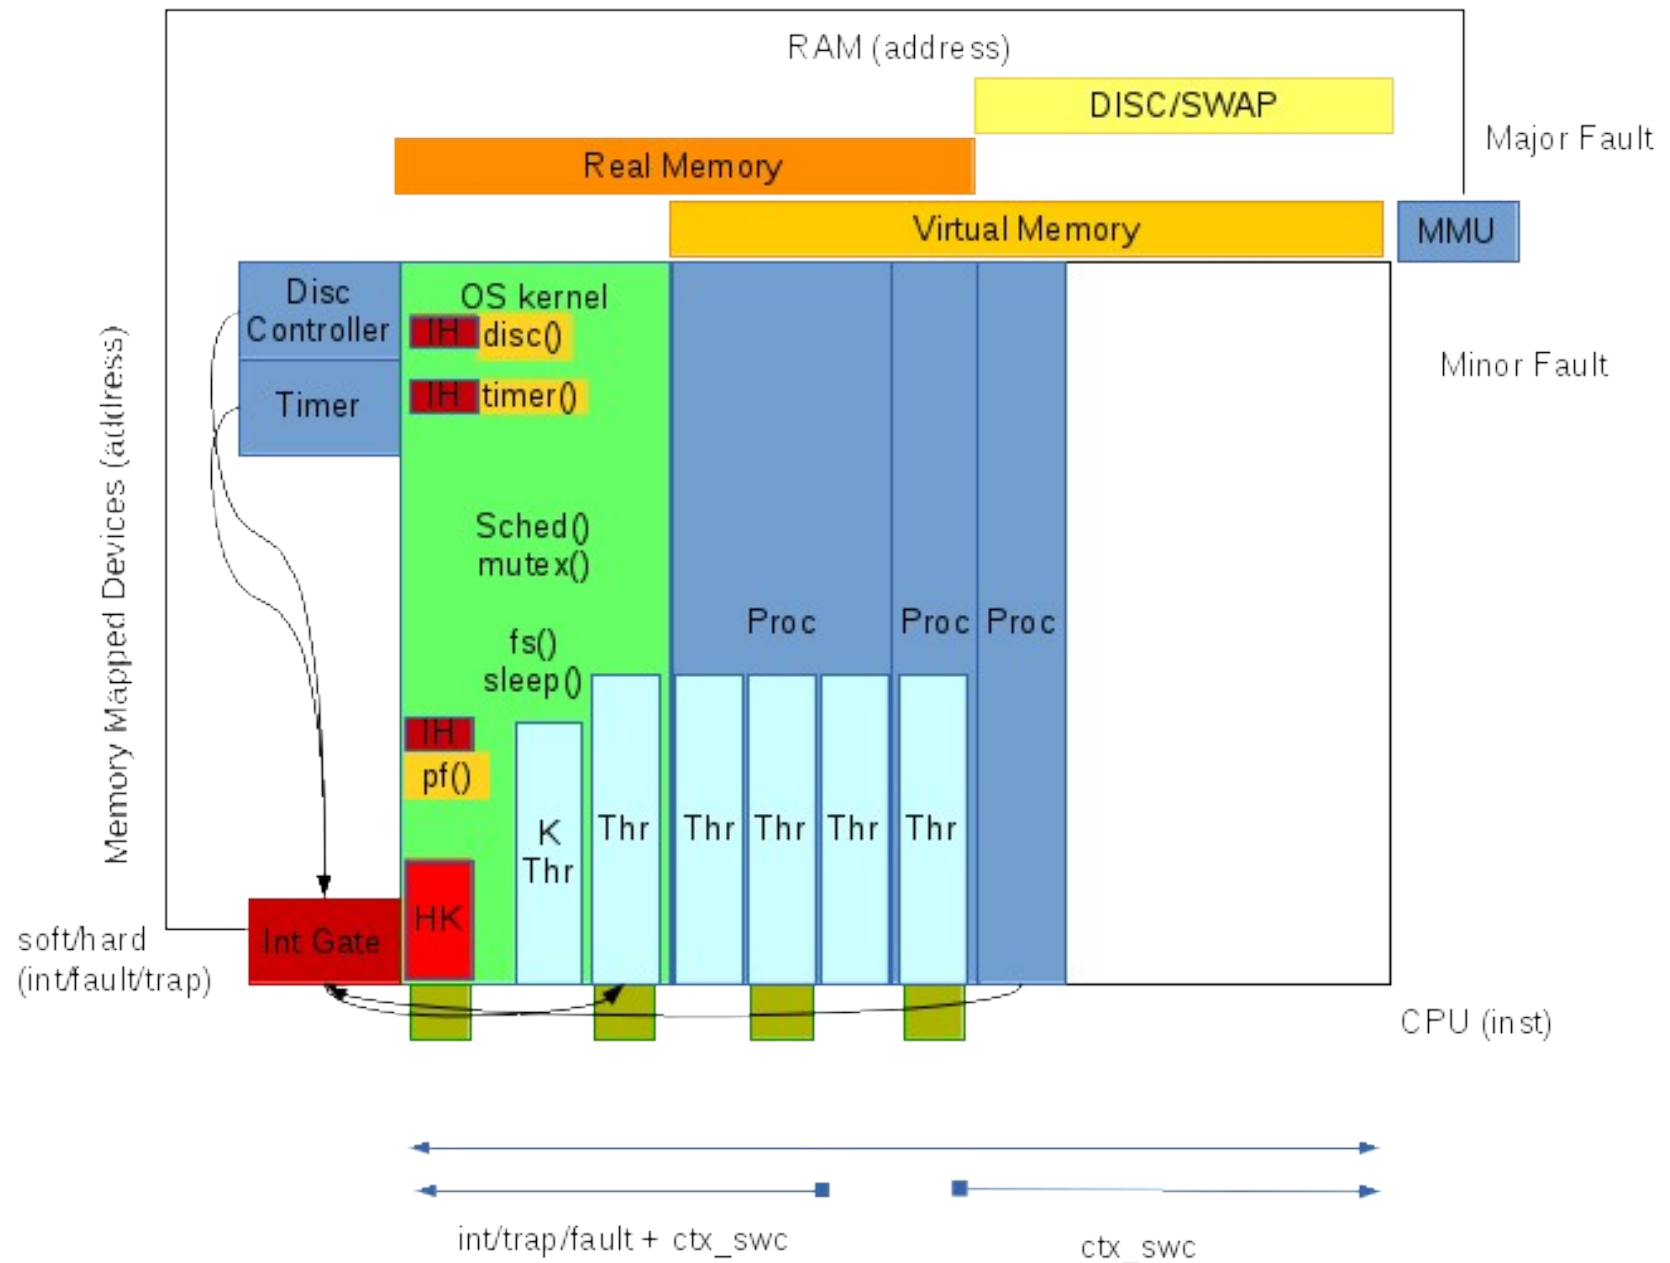

Memory Protection - MMU

OS with a Micro-Kernel

OS as we know

What does Real-Time
means?

Event -> Response,
latency,
response time,
deadline...

Real-Time means
fast?

Real Time != FAST!

RT means

Determinism,

WCET,

Response Time.

What is a Real-Time
Operating System?

$$\begin{array}{c} \text{Deterministic hardware} \\ + \\ \text{Deterministic hardware abstraction} \\ + \\ \text{Services with WCET} \\ + \\ \text{Deterministic Resource Management} \\ = \\ ? \end{array}$$

Real-Time Operating System Examples

?

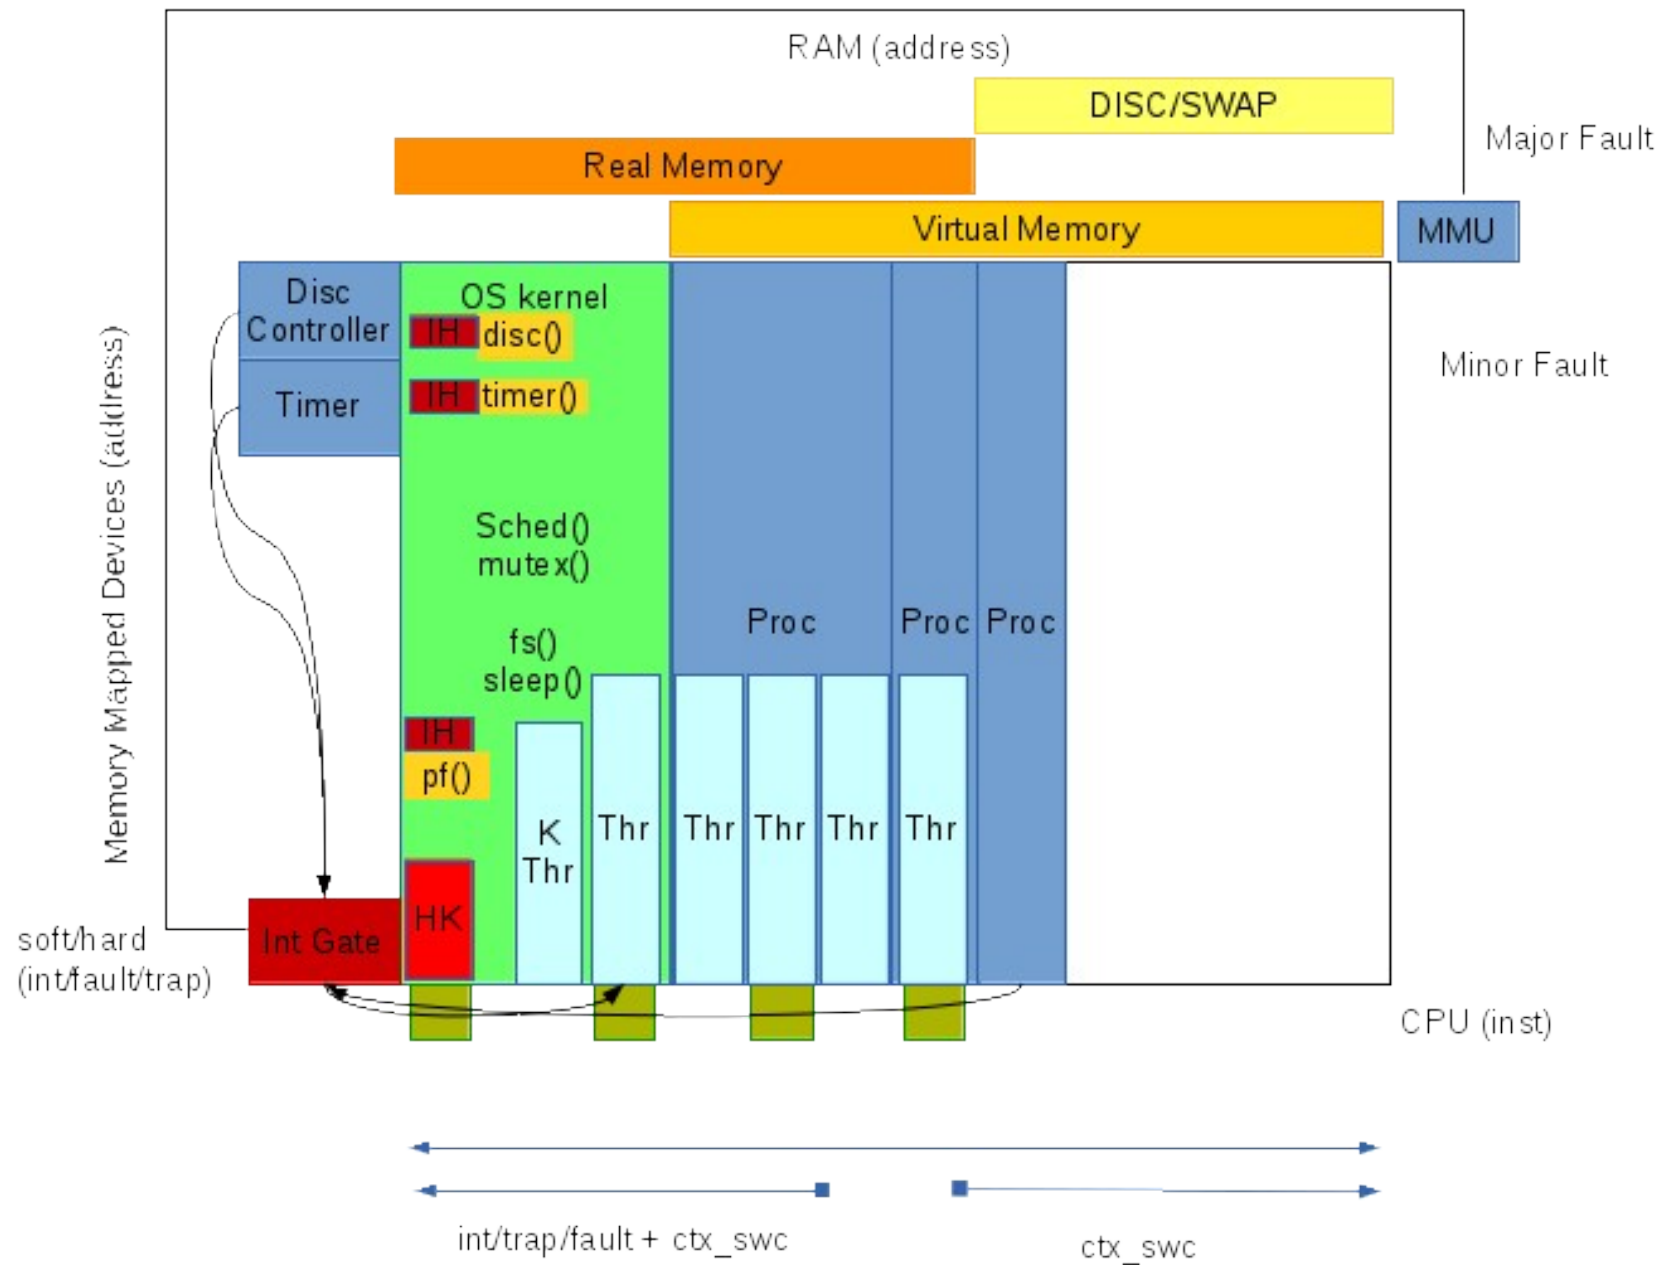

FreeRTOS

Neutrino (QNX)

Linux ?

Why is Linux not a
RTOS?

Linux is too much flexible

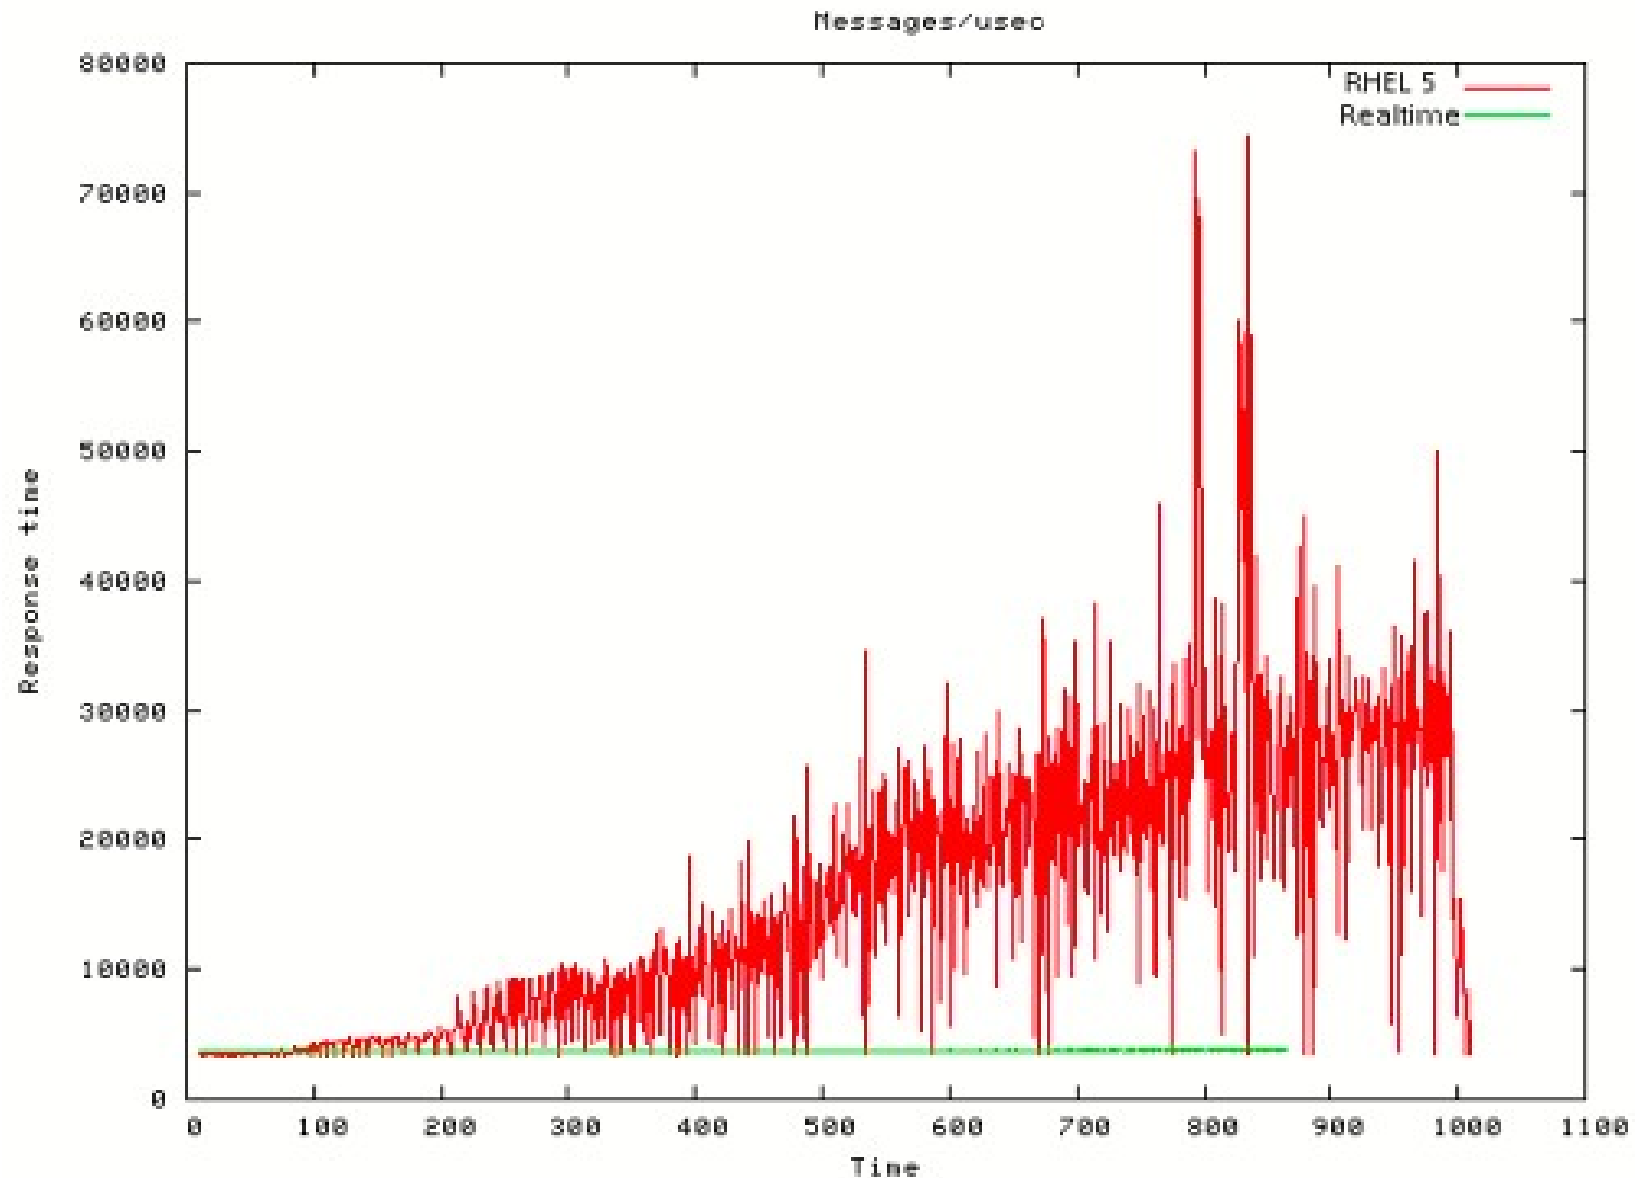

General Purpose OS

- Linux not is a RTOS by conception
- Higher throughput rather than higher determinism.
 - High latency.
- But has:
 - Static priority sched: FIFO and RR

Linux as a RTOS?

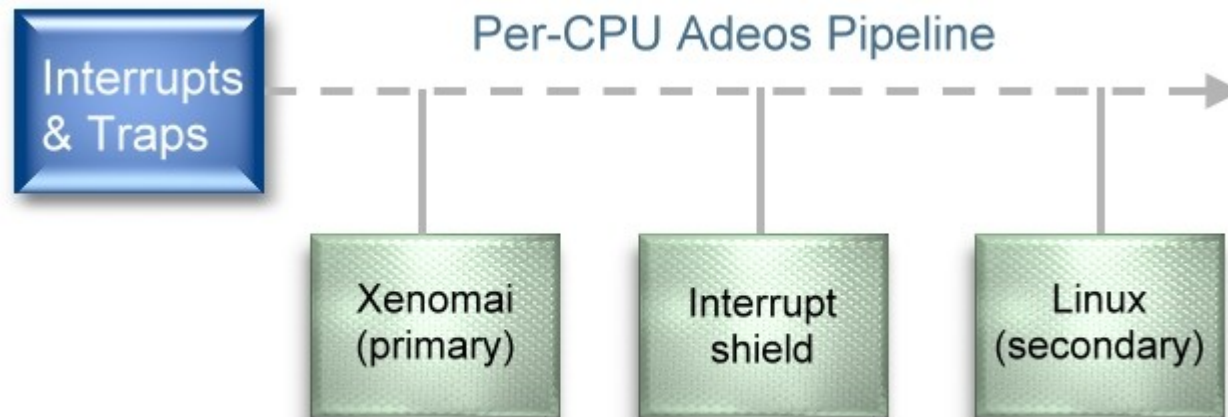

- Why?
- Hardware support
 - ARM, MIPS, POWERPC, intel, TILE 64, ADBF...
- Services
 - FS, Network Stack...
- Money
 - Rich company X needs a low latency Oracle database.

How Red Hat shows your Real-Time Linux

Real-Time Linux: Past, Present, Possible Futures...

RTAI and Xenomai

RT Task on Xenomai

+

Non-RT on Linux...

=

) :)

<- this is a bipolar emoticon

PREEMPT-RT

- latency
- + control over OS tasks

Sources of latency

- IRQ Handling
 - Softirq
- Preempt off
 - spinlocks
- IRQ off

Preemptive lock

Priority inversion problems...

IRQ Handling

How good is PREEMPT_RT Today?

Linux 3.8.13: scheduling latency (IO-bound bg tasks)
min=1.85us max=5464.07us avg=6.23us median=4.60us stdev=15.91us

Linux 3.8.13 w/ PREEMPT-RT: scheduling latency (IO-bound bg tasks)
min=1.47us max=44.16us avg=4.12us median=4.07us stdev=0.99us

PREMPT-RT is **WONDERFULL!**

Let's use everywhere!!!

This is another bipolar emoticon, but more happy
than another...

How expensive is
PREEMP-RT?

LITMUS^{RT}

A **testbed** for multiprocessor **scheduling**
in **Real-Time** Systems

(Partitioned | Global | Clustered) EDF

Partitioned Fixed-Priority

PD2 (PFAIR)

Mutual Exclusion

Interrupt Handling

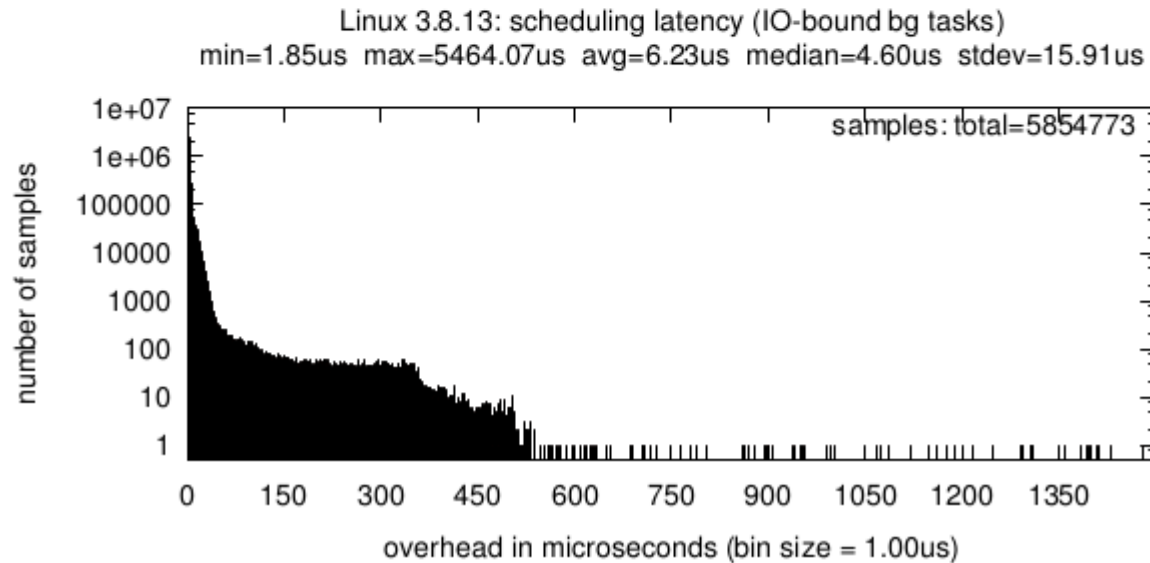

Real-Time GPU Management

Tracing Tools

How good is Litmus RT?

(a) LITMUS^{RT} with the P-FP scheduler plugin

Litmus RT

=

a way to pick next task
with a RT API.

A little bit of my MS Degree dissertation...

Questions?
